

# Global Indian Scientists & Technocrats Forum (GIST)

*"GIST is an integrating platform that helps scientists and technocrats from the Indian diaspora to connect, network, and engage in bringing about a holistic development of the country to become a global power."*

# About Us

Global Indian Scientists & Technocrats Forum (GIST) is a visionary organization that was formed to become a key platform to bring together scientists and technocrats from the Indian diaspora from across the world, who are maestros in their fields. It was born under the patronage of Vijnana Bharati, the largest science movement in India.

Science & Technology are the critical drivers for empowering individuals, societies, countries, and ultimately mankind, and GIST is honored to be a part of this noble initiative. The GIST forum is proud to be the largest repository of Indian Scientists and Technocrats from the world over with their respective domain knowledge to enable the exploration of suitable engagement opportunities. Such engagement opportunities encompass a wide range of activities in the areas of education, healthcare, food & agriculture, water, energy, infrastructure, manufacturing, information & communication technology (ICT), robotics, machine learning, livelihood generation, and many more.

# Objectives

- Facilitate interaction with academic institutions, research organizations, NGOs, and government agencies for pursuing developmental activities through scientific approaches
- Integrate various subject matter experts from various domains and strengthen academic institutions, social workers, and NGOs with scientific knowledge
- Create a common pool of knowledge and facilitate the collaboration of the Indian diaspora and Indian minds in research and development to help in solving various developmental challenges that are before India
- Create a scientific ecosystem to collaborate with global Indians in the field of science and technology
- Constitute think tanks and task forces to suggest modifications in policies related to science and technology

## Our Vision

To unite global scientific minds in advancing innovation, sustainability, and well-being for all humanity.

## Our Mission

Provide a platform to scientists, technologists, research organizations, and academic institutions to provide access to problems and together inspire, motivate, collaborate, and generate eco-friendly and sustainable solutions for a better life for everyone.

# Focus Areas

The purpose is to bring scientists and technocrats together to provide a healthy living and a prosperous future through scientific solutions and technological interventions for the people around the world.

## Aahaar Kranti

A national campaign on Nutrition and Immunity Awareness through embracing diet based on both modern science and traditional Indian Knowledge Systems that is with the rich culinary heritage.

## Agriculture

Promoting better agriculture practices and improving farmers' economic welfare while providing better nutrition for generations.

## Education

Empowering Indian youth and children with quality education, skill development, and technology; nurturing them into tomorrow's global leaders.

## Young Scientists & Innovators

Improving lives by channelling young scientist and innovator's passion for innovation into solutions that uplift communities.

## Ayurveda

Empowering individuals with Ayurvedic practices, to promote natural healing, balance, and improved quality of life.

## Environment

Uplifting communities through environmental improvement, fostering sustainable change for a brighter future.

## Diaspora Visiting Bharat

During their visits to Bharat, members of the Indian S&T diaspora can engage with institutions, industries, and societal organizations to share knowledge and strengthen the nation's scientific and developmental landscape.
